CODE OF CONDUCT

Our promise for your holistic wellbeing

At SIAM VITAL, we understand that true wellbeing has many facets - from inner calm to physical care. Our diverse product range, spanning from mushroom powders, teas, natural and lifestyle products to CBD and massage oils, commits us to the highest level of responsibility.

This Code is our promise to you.

1. Product-specific integrity & transparency

We guarantee clarity for every product.

- Plant-based & natural foundation:
  Whether tea, mushroom powder, or balm – we rely on the power of nature and ensure that all ingredients are of high purity.

- CBD products:
  When it comes to our CBD oils, we guarantee full legality, compliance with relevant THC limits, and provide certificates of analysis where legally required.

- No medical claims:
  We respect legal regulations and refrain from misleading medical statements. Our products support general wellbeing but do not replace medical treatment or consultation in any way.

We highly recommend consulting a physician or qualified healthcare professional before using our products, especially in cases of existing medical conditions, during pregnancy or breastfeeding, or when taking medication simultaneously.

Our products do not replace medical advice, diagnosis, or therapy. If you experience health concerns or uncertainties, please always consult a trusted medical professional.

2. Compliance with Our Product Categories

Our product range is divided into distinct categories to which we are committed:

- Mind & Relaxation / Energy & Vitality:
  Products assigned to these categories are carefully reviewed to ensure they contribute to relaxation or provide natural energy sources without relying on synthetic stimulants.

- Immunity & Balance / Digestive & Wellbeing:
  These products focus on natural, high-quality ingredients intended to support the body's natural balance.

- Beauty & Skin / Herbal Heritage:

For shampoos, balms, and massage oils, we guarantee dermatologically tested ingredients and authentic, often traditional, plant-based formulations.

3. Quality Assurance and Sustainability

Your safety and our planet deserve the highest standards.

- **Strict selection:**
  We select our suppliers based on rigorous criteria and prioritize certified organic quality whenever possible.

  Packaging:
- We minimize plastic waste and use recyclable or biodegradable packaging solutions for teas and capsules.

Disclaimer: The information in this Code serves to present our corporate values. Our products are not medicinal products and do not replace medical advice or diagnosis. If you have health concerns, always consult a medical professional.
